Course description

Join this programme to gain insights into Surgical Site Complication (SSC) Prevention and the use of sNPWT (Single-Use Negative Pressure Wound Therapy) from leading experts in orthopaedic, plastic and gynaecological surgery. Scientists and clinicians will come together to debunk common myths and misconceptions, providing clarity and evidence-based perspectives about sNPWT. Engage in discussions, participate in Q&A sessions, and exchange ideas with peers and experts about implementation of surgical bundles and SSC prevention.

Learning objectives

After completion of this Medical Education course, the attendees will be able to utilize steps for incorporation of sNPWT into surgical care bundles and protocols:

- Analyze evidence-based practices for preventing SSC in specific surgeries, focusing on sNPWT
- Strategize implementing a risk-stratified SSC pathway using real-world evidence
- Understand and apply single-use negative pressure wound therapy (sNPWT)
- Identify opportunities and barriers in implementing SSC pathways with real-world evidence

Participant profile

- Senior surgeons with 6+ years of experience in orthopaedic, plastic, or gynaecological surgery
- Participants should be actively looking to transform how surgical site complications are managed in partnership with the hospital at which they work
- Participants should have practical experience in their centre with use of sNPWT
- Fluency in English is required

Accreditation

Accredited by the Royal College of Surgeons of England
